PROFESSIONAL SUMMARY

B. Com (Hons) graduate with 18+ analytics projects and 3 production-deployed Streamlit applications covering ETL pipeline design, machine learning, and stakeholder-ready BI dashboards. Delivered measurable outcomes: 94.2% AUC-ROC churn model, 4.28% MAPE demand forecast, and a \$2.3M Power BI dashboard. Combines Python, SQL, R, Power BI, and Tableau depth with commercial business acumen to turn raw data into same-day decisions.

TECHNICAL SKILLS

Languages & Querying: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL (T-SQL, PostgreSQL, MySQL), R, Advanced Excel
BI & Visualization: Power BI (DAX, Data Modelling), Tableau, Streamlit, Chart.js, Google Analytics, KPI Dashboard Design

Data Engineering: ETL / Data Pipeline Development, Data Cleaning & Wrangling, EDA, CTEs, Window Functions, Stored Procedures, TRY-CATCH

ML & Statistics: Random Forest, Gradient Boosting, Logistic Regression, Neural Networks, A/B Testing, RFM Segmentation, Time Series Forecasting (ARIMA, SARIMAX, Prophet), CLV Analysis

Tools & Platforms: Git / GitHub, Jupiter Notebook, VS Code, MySQL Workbench, TensorFlow, Excel (Pivot Tables, VLOOKUP, Advanced Formulas)

PROJECTS

Retail RFM Customer Segmentation App [\[Live Streamlit App\]](#)

- Deployed a production Streamlit app for zero-code customer self-service, auto-segmenting users into VIP Champions, Core Loyalists, Regular Shoppers, and At-Risk tiers from live CSV uploads with one-click chart export. (Python · Pandas · RFM Scoring · Streamlit)

Formula 1 Race Predictor [\[Live Streamlit App\]](#)

- Built a zero-data-leakage Random Forest pipeline with temporal train/test split on pre-race features (grid position, season points, career wins, circuit), served live through a Streamlit interface backed by a relational SQL feature-view schema. (Python · Scikit-learn · SQL · Streamlit)

FIFA World Cup Match Predictor [\[Live Streamlit App\]](#)

- Engineered predictive features from historical tournament data and deployed live win-probability simulations through an interactive Streamlit app — end-to-end from raw data to production UI. (Python · Scikit-learn · Feature Engineering · Streamlit)

SaaS Customer Churn Analytics Platform [\[ML · Dashboard\]](#)

- Predicted churn across 2,500+ records at 94.2% AUC-ROC and 90.8% F1-Score using Gradient Boosting on a SQL-engineered cohort layer (CTEs, window functions, SMOTE), behind a real-time Chart.js risk-simulation dashboard. (Python · SQL · Gradient Boosting)

Superstore Sales Performance Dashboard [\[Power BI · DAX\]](#)

- Built a multi-dimensional Power BI dashboard with \$2.3M in sales, 12.48% profit margin, and 5,000+ orders across 793 customers with DAX-driven YoY growth and margin trend, flagging Technology and West region as top growth levers.

Retail Monthly Sales Forecasting Engine [\[Time Series\]](#)

- Achieved 4.28% MAPE on monthly demand forecasts by benchmarking SARIMAX against Facebook Prophet on an ADF-validated, seasonally-differenced time series to support inventory planning ahead of peak season. (Python · SARIMAX · Prophet)

Chinook Revenue Intelligence & Data Engineering [\[SQL · ETL\]](#)

- Surfaced top-value customers and made invoice ingestion failure-safe across 11 relational tables using DENSE_RANK () / PERCENT_RANK () CLV queries and a stored procedure with full transaction control and automatic rollback. (SQL · CTEs · Stored Procedures · TRY-CATCH)

A/B Testing Website Conversion Framework [\[Statistics\]](#)

- Validated a Design B rollout at $\alpha = 0.05$ using a dual-metric test — Two-Sample T-Test on session duration and Chi-Square on conversion rate — with KDE and proportion-chart diagnostics. (Python · SciPy · Hypothesis Testing)

Additional: Quantum Retail Analytics (R, life-stage segmentation, store trial design) · Bank Marketing Prediction (Python, 4-model benchmark, TensorFlow) · Tableau Manufacturing Downtime Analysis (Daikibo facility diagnostics).

PROFESSIONAL EXPERIENCE

Finance & Marketing Analytics Intern | Ads Klick Media May 2023 – Jul 2023

- Surfaced channel-level performance insights across multi-channel digital campaigns via Google Analytics and Excel analysis, directly informing weekly budget-allocation decisions for the marketing team.
- Reduced manual reporting effort by building automated pivot-table KPI dashboards and reusable templates, eliminating repetitive spreadsheet work for finance and marketing stakeholders.

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Coursera (2026)
- Data Analytics Job Simulations — Tata GenAI, Deloitte & Quantum via Forage (2025–2026)
- Data Analytics Professional Certificate — Intellipaat (2026) · Microsoft Excel Certification (2024)

EDUCATION

Bachelor of Commerce (Honours) | Amity University, Noida 2021 – 2024
