PROFESSIONAL SUMMARY

B.Com (Hons) graduate with 18+ self-directed analytics projects spanning Python, SQL, R, Power BI, and Tableau — including 3 production-deployed Streamlit applications. Delivered measurable outcomes such as a 94.2% AUC-ROC churn model and 4.28% MAPE demand forecast by pairing statistical rigor with business-first dashboard design and data cleaning discipline. Targeting Data Analyst / BI Analyst roles that turn raw data into decisions stakeholders can act on the same day.

TECHNICAL SKILLS

Languages & Querying Python, SQL (T-SQL, PostgreSQL, MySQL), R, Advanced Excel

BI & Visualization Power BI (DAX, Data Modeling), Tableau, Streamlit, Chart.js, Google Analytics

Data Engineering & Analysis ETL / Data Pipeline Development, Data Cleaning & Wrangling, Exploratory Data Analysis (EDA), CTEs, Window Functions, Stored Procedures

Machine Learning & Statistics Random Forest, Gradient Boosting, Logistic Regression, Neural Networks, SVD / Collaborative Filtering, A/B Testing, Hypothesis Testing, RFM Segmentation, Time Series Forecasting (ARIMA, SARIMAX, Prophet), CLV Analysis

Business & Stakeholder Skills Dashboard Reporting, KPI Tracking, Stakeholder Communication, Ad-Hoc Business Analysis, Data-Driven Decision Support

Tools & Platforms Git / GitHub, Jupyter Notebook, VS Code, MySQL Workbench, Excel (Pivot Tables, VLOOKUP, Advanced Formulas)

SELECTED PROJECTS

Retail RFM Customer Segmentation App [LIVE] [Link](#)

- Let marketing stakeholders self-serve customer insights with zero coding, by deploying a production Streamlit app that auto-scores and segments customers into VIP Champions, Core Loyalists, Regular Shoppers, and At -Risk tiers from live CSV uploads, with one-click chart export.

Formula 1 Race Predictor [LIVE] [Link](#)

- Forecasted Grand Prix win probabilities with zero data leakage, by designing a temporal train/test split Random Forest pipeline on pre-race features — grid position, season points, career wins, circuit — served live through a relational SQL feature-view schema behind an interactive Streamlit interface.

FIFA World Cup Match Predictor [LIVE] [Link](#)

- Simulated World Cup match outcomes on demand, by engineering predictive features from historical tournament data and serving live win-probability simulations through an interactive Streamlit app.

SaaS Customer Churn Analytics Platform [Link](#)

- Predicted customer churn across 2,500+ records at 94.2% AUC-ROC and 90.8% F1-Score, by building a Gradient Boosting model on a SQL-engineered cohort layer (CTEs, window functions, SMOTE class-balancing) behind a real-time Chart.js risk-simulation dashboard.

Superstore Sales Performance Dashboard [Link](#)

- Gave stakeholders a live view of \$2.3M in sales, 12.48% profit margin, and 5,000+ orders across 793 customers, by building a multi-dimensional Power BI dashboard with DAX measures for YoY growth and margin trend, flagging Technology and West region as the top growth levers.

Retail Monthly Sales Forecasting Engine [Link](#)

- Hit 4.28% MAPE on monthly demand forecasts to support inventory planning ahead of peak season, by benchmarking SARIMAX against Facebook Prophet on an ADF-validated, seasonally-differenced time series.

Chinook Revenue Intelligence & Data Engineering [Link](#)

- Surfaced top-value customers and made multi-table invoice ingestion failure-safe across 11 relational tables, by writing DENSE_RANK() / PERCENT_RANK() CLV segmentation queries and a stored procedure with transaction control and automatic rollback.

A/B Testing Website Conversion Framework [Link](#)

- Validated a Design B rollout at $\alpha = 0.05$ significance, by designing a dual-metric A/B test — Two-Sample T-Test on session duration, Chi-Square test on conversion rate — backed by KDE and proportion-chart diagnostics.

Quantum Retail Analytics & Store Trial Analysis [Link](#)

- Quantum Retail Analytics & Store Trial Analysis — R, A/B Testing: life-stage segmentation and Pearson-correlation control-store design for trial rollout decisions.

Bank Marketing Campaign Prediction [Link](#)

- Bank Marketing Campaign Prediction — Python, Scikit-Learn, TensorFlow, GridSearchCV: 4-model benchmark (Logistic Regression through Neural Network) for term-deposit subscription prediction.
- Tableau Manufacturing Downtime Analysis** [Link](#)
- Tableau Manufacturing Downtime Analysis — Tableau: factory/equipment downtime diagnostics identifying the top disruption driver across Daikibo facilities.

PROFESSIONAL EXPERIENCE

Finance & Marketing Analytics Intern	May '23 — Jul '23
Ads Klick Media	
• Informed budget-allocation decisions across multi-channel digital campaigns, by analyzing channel-level performance data in Excel and Google Analytics. • Cut manual reporting time, by automating pivot-table-based KPI dashboards and reporting templates for marketing and finance stakeholders. • Tracked campaign ROI and budget performance, by building structured summary reports with advanced Excel formulas and charts.	

CERTIFICATIONS

Google Data Analytics Professional Certificate , Coursera	Jan '26
Tata GenAI Data Analytics Job Simulation , Forage	Jan '25
Deloitte Data Analytics Job Simulation , Forage	Jan '26
Quantum Data Analytics Virtual Internship , Forage	Jan '26
Microsoft Excel Certification	Jan '24
Data Analytics Professional Certificate , Intellipaat	Jan '26

EDUCATION

Bachelor of Commerce (Honours) , Amity University	'21 — '24
	Noida
• Relevant Coursework: Statistics, Financial Accounting, Corporate Finance, Economics, Business Management
