PROFESSIONAL SUMMARY

B. Com (Hons) graduate (2024) with a Data Analytics certification from Intellipaat, in association with IIT Roorkee, backed by 18+ self-driven analytics projects, including 3 production-deployed Streamlit apps spanning data pipelines, machine learning, and BI dashboards. Key project results: 94.2% AUC-ROC churn model, 4.28% MAPE demand forecast, \$2.3M Power BI dashboard. Proficient in Python, SQL, Excel, R, Power BI, and Tableau, with hands-on use of AI tools to speed up analysis and visualization work.

CORE SKILLS

- **Languages & Querying:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL (T-SQL, PostgreSQL, MySQL), R, Advanced Excel
- **BI & Visualization:** Power BI (DAX, Data Modelling), Tableau, Streamlit, Chart.js, Google Analytics, KPI Dashboard Design, Data Storytelling
- **Data Engineering:** Data Cleaning & Wrangling, EDA, CTEs, Window Functions, Stored Procedures
- **ML & Statistics:** Random Forest, Gradient Boosting, Logistic Regression, Neural Networks, A/B Testing, RFM Segmentation, Time Series Forecasting
- **Tools:** Git/GitHub, Jupyter Notebook, VS Code, MySQL Workbench, Excel (Pivot Tables, VLOOKUP)
- **AI-Augmented Analytics:** Using AI tools for Excel formula building, SQL query writing, Python scripting, and dashboard/visualization design (Power BI, Tableau, Excel)
- **Business Analysis:** Requirement Gathering, Stakeholder Communication, Cross-Functional Collaboration, KPI Reporting

EXPERIENCE

Finance & Marketing Analytics Intern | [Ads Klick Media](#)

May 2023 - Jul 2023

- Collaborated with cross-functional finance and marketing stakeholders, surfacing channel-level performance insights via Google Analytics and Excel that drove +20% reach and +25% engagement, informing weekly budget decisions.
- Gathered reporting requirements from stakeholders and created automated pivot-table KPI dashboards and reusable templates, eliminating repetitive manual reporting.

SELECTED PROJECTS (18+ TOTAL, 2024 - PRESENT)

[Retail RFM Customer Segmentation App](#) - Live Streamlit App | [GitHub](#)

- Deployed a production Streamlit app auto-segmenting customers into VIP Champions, Core Loyalists, Regular Shoppers, and At-Risk tiers from live CSV uploads. (Python, Streamlit)

[Formula 1 Race Predictor](#) - Live Streamlit App | [GitHub](#)

- Built a Random Forest pipeline with temporal train/test split on pre-race features (grid position, season points, career wins, circuit), served live via Streamlit. (Python, Streamlit)

[FIFA World Cup Match Predictor](#) - Live Streamlit App | [GitHub](#)

- Engineered predictive features from historical tournament data and deployed live win-probability simulations through an interactive Streamlit app. (Python, Streamlit)

[SaaS Customer Churn Analytics Platform](#) - ML, Dashboard

- Predicted churn across 2,500+ records at 94.2% AUC-ROC and 90.8% F1-Score using Gradient Boosting on a SQL cohort layer (CTEs, window functions, SMOTE), with a Chart.js risk dashboard. (Python, SQL)

[Superstore Sales Performance Dashboard](#) - Power BI, DAX

- Built a Power BI dashboard with \$2.3M in sales, 12.48% profit margin, and 5,000+ orders across 793 customers, flagging Technology and West as top growth levers. (Power BI, DAX, Excel)

[Retail Monthly Sales Forecasting Engine](#) - Time Series

- Achieved 4.28% MAPE on monthly demand forecasts by benchmarking SARIMAX against Facebook Prophet on an ADF-validated, seasonally-differenced time series to support inventory planning. (Python, SARIMAX)

[Chinook Revenue Intelligence & Data Engineering](#) - SQL, ETL

- Surfaced top-value customers and made invoice ingestion failure-safe across 11 relational tables using DENSE_RANK()/PERCENT_RANK() CLV queries and a rollback-safe stored procedure. (SQL)

[A/B Testing Website Conversion Framework](#) - Statistics

- Validated a Design B rollout at alpha=0.05 using a dual-metric test (Two-Sample T-Test on session duration, Chi-Square on conversion rate) with KDE diagnostics. (Python, SciPy)

[Netflix Movie Recommendation System](#) - ML, Recommender System

- Built a collaborative-filtering recommendation engine using SVD matrix factorization on the Netflix Prize dataset, decomposing the user-movie rating matrix to generate personalized top-10 recommendations. (Python, scikit-surprise, SVD)

Additional: Quantum Retail Analytics, Bank Marketing Prediction, Tableau Manufacturing Downtime Analysis

CERTIFICATIONS | [View all certificates \(Google Drive\)](#)

- Google Data Analytics Professional Certificate, Coursera (2026); Data Analytics, SQL, Python & Power BI Certifications, Intellipaat in association with IIT Roorkee (2025-2026); Microsoft Excel Certification (2024)
- Job Simulations: Tata GenAI, Deloitte, Quantum, Forage (2025-2026)

EDUCATION

Bachelor of Commerce (Honours) | Amity University, Noida

2021 - 2024

Data Analytics Certification Program | Intellipaat, in association with IIT Roorkee

Jul 2025 - Jul 2026
